

InterContinental Warsaw chooses InnSpire for its cutting edge Mobile and IPTV Guest Engagement Solution

Stockholm, 2018-02-07 - With its 414 spacious and well-appointed rooms and suites, the prestigious Intercontinental Warsaw really is one of the most important landmarks in Warsaw. While being one of the tallest buildings in the city, the hotel's premier location adds to the many reasons guests love it. The address allows quick access to great tourist attractions, like Warsaw Old Town, the National Museum, and the Warsaw Uprising Museum.

So when the Director of Engineering at Intercontinental Warsaw, Tomasz Beliniak needed a Guest Engagement Solution to match the caliber of his hotel, he really meant it.

Mr. Beliniak says:

“We evaluated all the major players for speed, functionality, design and ease of use. After thorough analysis, we found that no one could match the total experience, and the level of innovation of InnSpire.”

“For us, offering great Guest Media Streaming for both iOS and Chromecast is a way to make our guests' stay even more enjoyable. We found that InnSpire is the only streaming solution that really works. With everything. Hassle free.”

A new addition to the multiple award-winning restaurants will be the best in class room service ordering through InnSpire's sleek and easy to use interface, as well as personalized entertainment, allowing seamless access to guests' own Netflix, HBO and Spotify accounts to name a few.

Filip Hector, Innspire Director of Sales for Europe concludes,

“We are very much looking forward to a strong partnership with the Intercontinental Warsaw and to continuously developing innovative technical solutions to maximize the guest experiences. With our new office in Warsaw, we aim to provide excellent support to partners across Poland and Central Europe.”
