

## Hospitality grade TVs

Introducing InnSpire's InnSmart solutions for easy deployment across a world of Smart-TVs from major brands such as Samsung or LG. By adding Chromcast and a Proxy solution – the solution becomes a truly immersive and easy to use 360° degree experience.

Featuring cutting-edge technology, InnSpire's InnSmart solutions offers grand new innovation. It includes multiple features that will keep you and your guests on the edge of your seats. Combining the traditional TV features with those of a smart TV, this is an all-in-one product that is user-friendly, dynamic and cost-efficient.

Whatever you are looking for, you will find it on the InnSpire InnSmart platform: great picture quality, immersive sound, a multitude of apps to use, Casting, videos both premium and free – and so much more. Finally, you can have it all.

## InnSmart Chromecast Turns Your Rooms into Media Centers

Your guests get to choose what they want to watch when they are with you, all the power of choice at their fingertips via the Cast to TV feature. There are over 200,000 TV shows and films available, and Netflix, YouTube, and Google Play are all just a click away. Simply connect your mobile device and the TV for a secure, fast, smooth connection!

### Connect with your guests!

Your guests will come to view you as a leader in entertainment, because you are giving them options.

- They decide what they want to watch
- Everything happens instantly
- Instructions and other info are readily available
- Each guest can view something different
- Environmental settings are simple
- Third-party programs? No problem!

### Turn every TV into an advertising venue

Your guests will – by and large – turn on their TVs at some point, and when they do, you want to be there. You can use our system to communicate with your guests, specifying the specific messages that they receive. This could be something as basic as your hotel logo or something as complex as sponsored content. You decide how to use your TVs!

### All the comfort of a TV at home

Although TVs are a fine amenity to have in any hotel, they don't quite match up to the ones that we keep in our homes. We want our devices to be our own! This innovation gives your guests the next best thing, a media platform that is compatible with music, photos, and online videos on a larger screen, all the choice and all the comfort that they would get if they were in their own bedroom.

### Stay on top of analytics so that you know what your guests are thinking

Remote monitoring always comes included in our platform, so you can stay ahead of your guests' behaviour. We can manage all your TVs remotely too, ensuring that everything continues to run smoothly. Personalisation and efficiency come with the territory!

## Cohesive oversight for optimal operation

Our all-inclusive tech platform will make everyone happy, from your guests to your staff, because it is easy-to-use and makes accessing high-quality content a cinch. The content management system is intuitive and ultra-powerful too!

## Choice Is Power

Either stick with the hospitality TV brand you know or pick from any of the others on the market. It is all up to you!

### ENTERTAINMENT

Our programming includes both free and paid options, including PPV, VOD, Google Chromecast, music channels, and more.

### AMENITIES & SERVICES

Your guests can communicate with you and receive promos and sponsored content – all at the speed of light.

### LIVE TV INFO FEEDS

What is going on in the world? Who won the big game? What will the weather be like tomorrow? All this more is right at your guests' fingertips.

### MOBILE DEVICE TV & ROOM CONTROL

Your guests get to control their own comfort by setting the lighting, TV settings, and more within their rooms.

### WAKE & SLEEP CONTROL

Wake up to some gentle music, a progressive light, or even the programme of their choice! Your guests are in charge, even turning everything off automatically on a schedule they get to set.

### FOLIO & REMOTE CHECK-OUT

Better guest experiences start here with the power of ultimate interactivity.
